</table>

Analysis of random disruptive events in shipping and port operations
*Saut Gurning, Stephen Cahoon* ................................................................. 99

Comparative analysis of efficiency for major Northeast Asia airports
*Hun-Koo Ha, Yuichiro Yoshida, Anming Zhang* ............................................. 112

Collective strategy and resilience in supply chains: opportunities for port managers
*Hilary Haugstetter, Stephen Cahoon* ............................................................ 137

Addressing modern piracy and maritime terrorism in Southeast Asia: a legal perspective
*Nong Hong* ........................................................................................................ 147

A port capacity study: planning models and evaluation
*Dušanka Jovović, Branislav Dragović, Vesna Dragović-Radinović, Maja Škurić* .................................................................................................................. 157

Obstacles to supply chain integration: empirical analysis of maritime firms
*Jasmine Siu Lee Lam* ........................................................................................ 169

An application of the Porter’s diamond framework: the case of Hong Kong airfreight industry
*Yui Yip Lau* ......................................................................................................... 179

Solving train blocking and scheduling problem by using a bi-level programming model and genetic algorithm
*Haiying Li, Zhaoxia Yang, Lingyun Meng, Xi Jiang, Jianrui Miao* ...................... 190

Sequencing minimum product set on mixed model U-lines to minimize work overload
*Jinlin Li, Jie Gao, Linyan Sun* ................................................................................ 203

Value of information sharing in marine mutual insurance
*Kevin Li, John Liu, Jia Yan, Jie Min* ................................................................. 214

Strict or relaxed: remedy for duty of disclosure
*Kevin Li, Yulan Wang, Jie Min* ............................................................................... 227
The effect of risk aversion on manufacturer promotion in a two-stage supply chain
Donghan Liang, Gang Li, Jie Gao, Linyan Sun, Xinyu Sun ............................... 243

Safety culture and safety behaviors in container shipping: a seafarer’s perspective
Chin-Shan Lu, Chaur-Luh Tsai ........................................................................ 253

Senior managers’ safety leadership and safety performance in container terminal operations
Chin-Shan Lu, Chung-Shan Yang ................................................................. 264

Analyzing the trade transport and the demand of multi-mode transport between China and Koreas
Jing Lu, Zhongzhen Yang ............................................................................ 284

A dynamic-economic model for container freight market
Meifeng Luo, Lixian Fan, Liming Liu ............................................................ 290

Port competition using capacity expansion and pricing
Meifeng Luo, Liming Liu, Fei Gao ................................................................. 305

The change process in a state-owned airline: the implementation of new electronic services
Kostas Malagas, Nikitas Nikitakos, Maria Ampartzaki ............................... 322

Maritime security instruments in practice: a critical review of the implementation of ISPS code in the port of Hong Kong
Koi Yu Adolf Ng .......................................................................................... 334

Maritime policy using multilayer CBR
Nikitas Nikitakos, Georgios Fikaris ............................................................ 349

The economics behind the awarding of terminals in seaports: economic issues in the pre-bidding phase
Theo Notteboom, Christophe Theys, Athanasios Pallis, Peter W De Langen ...... 360
Air transport liberalization and its impacts on airline competition and air passenger traffic
_Tae Hoon Oum, Anming Zhang, Xiaowen Fu_ .......................................................... 371

Inventory policy comparison on supply chain network by simulation technique
_Nam Kyu Park, B Dragovic, Woo Young Choi_ ....................................................... 391

Foreland-based regionalization: integrating intermediate hubs with port hinterlands
_Jean-Paul Rodrigue, Theo Notteboom_ ................................................................. 400

Accounting implications for lease classification in acquiring transportation assets
_Owen Tang_ .............................................................................................................. 418

Australian perspectives - port state control on marine pollution
_Owen Tang_ .............................................................................................................. 427

Bankruptcy Courts’ power on disposal of maritime asset
_Owen Tang_ .............................................................................................................. 436

An activity based costing model for liner shipping pricing management
_Shin-Chan Ting, Chung-Jen Yen_ ............................................................................. 444

Integrated berth and quay crane allocation to container vessels
_Zheng Tong, Jiyin Liu_ ............................................................................................ 453

The challenge of trade liberalization in logistics services: the case of Indonesia
_Jose Tongzon_ ......................................................................................................... 462

Ship standardisation on the Yangtze River
_Alfred W Veenstra_ ................................................................................................. 473

Maritime safety and security: developments and challenges
_Jin Wang_ .................................................................................................................. 485

The capacity utilization of a container shipping line
_Wei-Ming Wu_ ........................................................................................................ 495
Demand characteristics of Chinese transport logistics services
Jiaqi Yang .......................................................... 503

Use of fuzzy AHP to determine port hinterland development assessment criteria for free trade zone
Yi-Chih Yang .......................................................... 512

Impacts of port relocation on the location of port-relation industries
Zhongzhen Yang, Ying Li ................................................. 526

Model splits in rapid passenger transportation corridor
Zhongzhen Yang, Ying Li ................................................. 538

Study on the location of land-port in Guizhou
Zhongzhen Yang, Yonglei Jiang, Jing Lu ............................... 546

Unilateral GHG control measure and aviation industry: a theoretical analysis
Andrew C L Yuen, Anming Zhang ........................................ 555

Research on the construction method of container yard microanalysis simulation model
Jieshu Zhang .......................................................... 578

Studies of the concepts, features and development strategy of the fourth generation port based on supply chain thoughts
Jieshu Zhang, Hong Zhen, Jie Gao ........................................ 587
